Warship Flight Deck Stop-Go Lights

LED based, Night Vision Goggle compatible

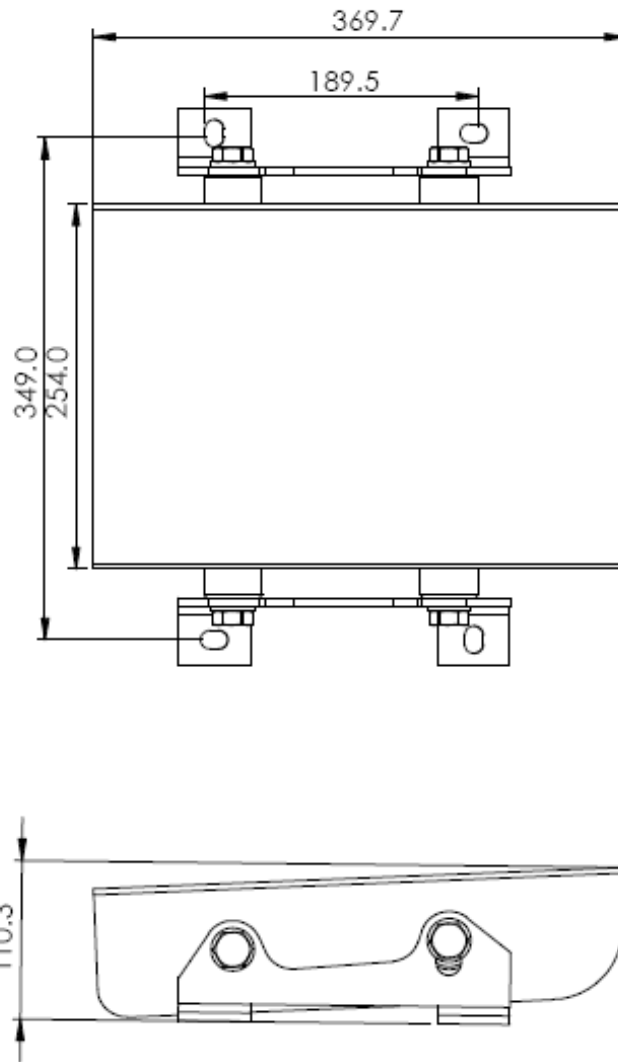

Consolite Technology is proud to introduce a new warship LED Stop-Go light. The unit is designed for any location requiring unambiguous stop-go signals with NVG compatibility. This includes flight decks to provide information to the Flight Deck Officer during helicopter launch and recovery operations, and other locations such as boat bays and well docks.

- Range of voltages: 230V, 115V, 24V
- LED lighting: High reliability, "fit and forget"
- Two colour options: Red/Green outputs as standard, other options available
- NVG compatible: No interference with aviators' NVGs, IAW Def Stan 02-587 Part3
- Optimised intensity: Sunlight readable but visually secure
- Rugged construction: Well suited to the marine and flight deck environment
- EMC compliant: No false signals, no emissions
- Fully adjustable: Can be tailored to different deck configurations

A full control system can also be provided to permit control from Bridge or Flyco positions, with additional functionality such as dimming and flashing modes if required.
