

Consolite Technology Data Sheet

Material Ref: CTL-R071

Function: UK NVG Red Polymer Filter, Incandescent Source

Description

The filter material provides NVG Red in accordance with UK specifications when used with a suitable filament lamp source.

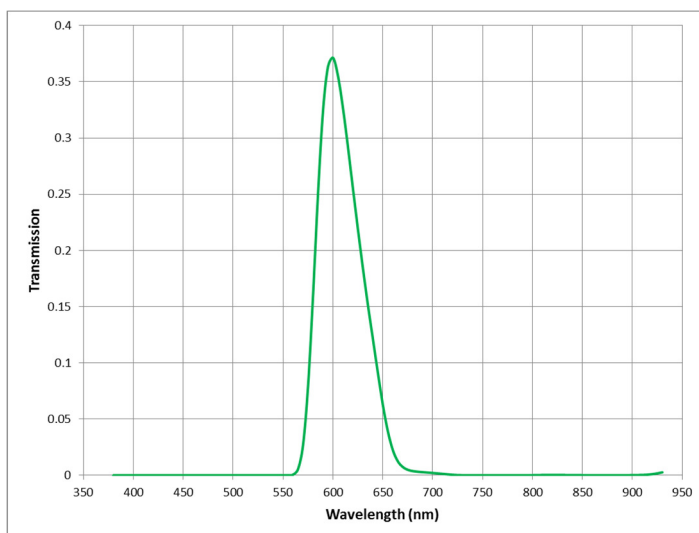

Nominal thickness: 1.0mm

Performance

Indicative performance figures below are quoted for CTL-R071 in combination with a typical T1¾ 28V, 40mA lamp operating at 1950K, and may vary.

Green/Red Ratio		Chromaticity		Photopic Transmission
I3	I3(W)	u'	v'	
4.4	12.6	.417	.537	14%

Spectral Transmission

Chromaticity Coordinates (CIE 1976)
